##### 1、會議說明(Conference Description)：

國立雲林科技大學設計學院設計學研究所，於設計教育與研究、產官學合作上致力耕耘。為增進設計研究能量，2014 年起舉辦「國際設計研究論壇暨研討會」，至今為第十三屆。本屆以「設計跨域：Design Beyond Borders」為主題，首度整合國際學術研討會與實作導向之設計工作營，透過理論對話與在地實踐並行的形式，探討設計如何跨越學科、文化與技術界線，回應當代社會、科技與文化議題。

The Graduate School of Design, College of Design, National Yunlin University of Science and Technology, has long been committed to advancing design education and research, as well as fostering collaboration among academia, industry, and government. Since 2014, the school has hosted the International Design Studies Forum and Conference to strengthen research capacity in design. The 2026 event marks its 13th edition.

With the theme “Interdisciplinary Design: Design Beyond Borders,” this year’s forum, for the first time, integrates an international academic conference with a practice-oriented integrated design workshop. Through the parallel engagement of theoretical dialogue and situated practice, the event explores how design can transcend disciplinary, cultural, and technological boundaries in response to contemporary social, technological, and cultural challenges.

##### 2、會議日期(Dates)：

第十三屆國際設計研究論壇研討會暨國際整合設計工作營預定於 2026 年 7 月 3 日(五)-2026 年 7 月 5 日(日)舉辦。

The 13th International Design Studies Forum and Conference & International Integrated Design Workshop is scheduled to be held from July 3 (Friday) to July 5 (Sunday), 2026.

### 3、會議主題(Conference theme)：

本次活動以《設計跨域:Design Beyond Borders》為統一主題,在全球急遽變化的今日・設計不再侷限於形式與功能的範疇・而是成為連結多元知識體系、文化背景與科技發展的樞紐。人類面臨前所未有的挑戰氣候災難、科技轉型、社會分化、價值重組正呼喚著設計超越傳統疆界的回應。

This event adopts “Interdisciplinary Design: Design Beyond Borders” as its unifying theme. In today’s rapidly changing global context, design is no longer confined to the domains of form and function; instead, it has become a critical nexus that connects diverse knowledge systems, cultural contexts, and technological developments.

Humanity is confronting unprecedented challenges, including climate crises, technological transformation, social fragmentation, and the reconfiguration of values. These conditions call for design responses that move beyond traditional boundaries.
